**Forward-Looking Statements.** Our presentation today, including the slides contained herein, contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts or guarantees of future performance and are based on management's assumptions and expectations, which are inherently subject to difficult to predict uncertainties, risks and changes in circumstances. The use of words such as "intends," "expects," "may," "believes," "should," "seeks," "intends," "plans," "potential," "will," "projects," "estimates," "anticipates" or similar expressions generally identify forward-looking statements. However, these words are not the exclusive means of identifying such statements, and any statements that refer to expectations, beliefs, plans, predictions, projections, forecasts, objectives, assumptions, models, illustrations, profiles or other characterizations of future events or circumstances are forward-looking statements, including without limitation statements relating to future revenues, expenses, margins, performance, profitability, cash flows, net income/(loss), earnings per share, growth rates and other measures of results of operations (such as, among others, EBITDA or adjusted EBITDA) and future growth prospects for TripAdvisor's business. Actual results and the timing and outcome of events may differ materially from those expressed or implied in the forward-looking statements for a variety of reasons, including, among others, those discussed in the "Risk Factors" section of our Annual Report on Form 10-K, as amended. Except as required by law, we undertake no obligation to update any forward-looking or other statements in this presentation, whether as a result of new information, future events or otherwise. Investors are cautioned not to place undue reliance on forward-looking statements.

**Non-GAAP Measures.** This presentation also includes discussion of both GAAP and non-GAAP financial measures. Important information regarding TripAdvisor's definition and use of these measures, as well as reconciliations of the non-GAAP financial measure to the most directly comparable GAAP financial measure are included in the press release reporting our second quarter 2013 financial results, which is available on the Investor Relations section of our website: [www.tripadvisor.com](http://www.tripadvisor.com). These non-GAAP measures are intended to supplement, not substitute for, GAAP comparable measures. Investors are urged to consider carefully the comparable GAAP measures and reconciliations.

**Industry / Market Data.** Industry and market data used in this presentation have been obtained from industry publications and sources as well as from research reports prepared for other purposes. We have not independently verified the data obtained from these sources and cannot assure you of the data's accuracy or completeness.

For my first time in Maldives, it was a very expensive holiday. The underwater or even wine experts around beaches a part some of the fun.

My husband and I were told the resort was hard to find, but it was worth the effort. We had a wonderful time and we felt like the only ones there.

(1) Adjusted EBITDA is defined as net income (loss) plus: (i) provision for income taxes; (ii) other (income) expense, net; (iii) depreciation of property and equipment, including internal use software and website development; (iv) amortization of intangible assets; (v) stock-based compensation; and (vi) non-recurring expenses.

(2) Includes internal use software and website development amortization.

(3) Our primary operating metric prior to the Spin-Off for evaluating operating performance was Operating Income Before Amortization ("OIBA"), as reported on our Form S-4 filed on November 1, 2011.

OIBA is defined as net income (loss) plus: (i) provision for income taxes; (ii) other (income) expense, net; (iii) amortization of intangible assets; (iv) stock-based compensation; and (v) non-recurring expenses.

This operating metric is no longer being used by our management to measure operating performance and is only being shown above to illustrate the financial impact given that we converted to a new operating metric after the Spin-Off during the year ended December 31, 2011.

(4) Represents the reduction in the income tax benefit recorded for all periods presented based on our effective tax rate, adjusted for non-GAAP items.
